

Q100 R/200 R

Ultra-compact, everyday performance.

Q100 R

Q200 R

SMARTLY DESIGNED to challenge indoor/outdoor powerchair standards, the QUICKIE Q100 R and Q200 R are ultra-compact for indoor agility, with stability and performance that's just at home on the city streets. Smart design, smart looks at a smart price - it's not just an entry-level powerchair, it's your every-day powerchair.

QUICKIE Q100 R/200 R KEY BENEFITS

SMART BASE TECHNOLOGY

The innovative testing method used to understand how geometry changes to a drive base can affect performance, creating a precision-measured TRUE indoor/outdoor powerchair.

COMPACT INDOOR AGILITY

Ultra-slim base width starting at 540 mm and a turning circle from 150 mm. Simple, intuitive controls for a drive that's made for the twists and turns of everyday life.

OUTDOOR PERFORMANCE

Carefully calculated dimensions to deliver the very-best traction and stability outdoors. Punchy 55 Ah batteries for 19 miles of adventure.

TRANSPORT FRIENDLY

Weighs in at a ridiculously-light 95 kg, making it a breeze to hoist and crash-tested for use as a seat whilst in transport.

STYLISHLY PRACTICAL

A streamlined, minimalistic design contrasted with sleek, black bodywork. Make it personal with a seating system designed to fit you and a selection of vibrant colour inlays.

TILT-IN-SPACE

Q200 is now available in Tilt-in-space. The narrowest chassis available (57cm), 3" centre of gravity and 22° tilt-in-space, the Q200-R is the smallest rear wheeldrive tilt-in-space powerchair on the market.

ALL INDOOR/OUTDOOR POWERCHAIRS
FACE THE SAME PROBLEM...

The background features a technical line drawing of a powerchair chassis. On the left, a portion of a tire with a tread pattern is visible. The chassis drawing includes various components like the motor, drive shafts, and wheels. Dimensions are indicated with lines and numbers: '300' at the top left, '82°' at the top right, '3°' on the left side, '90' at the bottom left, and '1050' at the bottom center. The main title is centered over the drawing.

SMART BASE TECHNOLOGY IS HOW QUICKIE SOLVED IT.

With the Q100 R/200 R, our vision was to create a TRUE indoor/outdoor powerchair. One with super-tight indoor manoeuvrability and ZERO compromise on outdoor stability and performance. But how do you design such a finely-balanced powerchair?

Lean towards a large drive-base and you'll encounter difficulty manoeuvring in tight environments. Go too small and it'll be too tippy with a loss of traction. Finding the perfect combination requires testing 100's of configurations. So that's exactly what we did - with SMART BASE TECHNOLOGY.

A SMART powerchair testing chassis that allows for quick adjustments to the width, length, castor/drive wheel height and seat position. Carefully making precise adjustments until we perfected the ideal base geometry for a TRUE indoor/outdoor powerchair.

The result is the **QUICKIE Q100 R** and **Q200 R**. A legitimately compact entry-level powerchair that delivers the very-best traction, stability and even the ability to climb kerbs of up to 100 mm (4").

DESIGNED TO BE IN YOUR SPACE

Whether it's around the home, the local cafe or shopping mall, the Q100 R/200 R is in touch with its environment inside and out. With an ultra-slim base and tiny turning circle, even the smallest place will feel big.

Go where other powerchairs can't

Precision-measured in length, the Q100 R (1010 mm) and Q200 R (1070 mm) will conveniently fit in-and-out of floor lifts and other short spaces without the traditional sacrifice of stability.

Q200 R
1700 mm

Q100 R
1600 mm

**Turn heads and your powerchair
everywhere you go**

Get out of any tight-spots with the Q100/200 and its ultra-compact turning circle. Effortlessly turn in narrow hallways, kitchens and other restricted spaces without the need for complicated manoeuvres.

Compact, practical and easy to drive

The Q100 R and Q200 R's rear-wheel drive is incredibly intuitive to drive. With a simple to understand control system, you'll easily be able to negotiate even the tightest of situations with ease.

So narrow-minded

Fed up of clipping the side of your powerchair or scratching the paint work when squeezing through a tight doorway? The Q100 R/200 R's ULTRA-SLIM BASE can go where other indoor/outdoor powerchairs won't fit - so even negotiating narrow paths or packed tables at your favourite cafe will be a breeze (especially with the Q100 R and its unbelievably narrow 540 mm width).

Q200 R: 570 mm

Easy transfers

The legrests and controller can also swing outwards, so the Q100 R/200 R can get even-closer to objects like tables and chairs for an easier transfer in-or-out of your powerchair.

THE SMALL POWERCHAIR THAT'S BIG ON GOING OUT

Popping out? The Q100 R/200 R's indoor capabilities are just at home outdoors. Painstakingly researched, its compact dimensions provide highly-deceptive traction and stability over a variety of terrains, hills and even when tackling kerbs.

Never an up-hill struggle

Indoor/outdoor powerchairs don't traditionally cope well with steep gradients - a problem we solved with SMART BASE TECHNOLOGY. Precision-testing determined that a 1010 mm (Q100 R) and 1070 mm (Q200 R) base-length provides the best stability to prevent tipping and keep you safe - even when travelling up hills of 6 degrees.

Handle whatever comes your way

SMART BASE TECHNOLOGY helped to calculate not only the dimensions for a compact base, but also the ideal seated position for MAXIMISING TRACTION between the drive-wheel and the ground. Combined with the Q100 R/200 R drive-wheel suspension, you'll enjoy the kind of safe, smooth and responsive ride that's normally expected from a larger powerchair.

Don't let kerbs get in the way

Need a little assistance climbing obstacles? The Q100 R/200 R's low-impact kerb climber will tackle kerbs of up-to 100 mm (4") at low-speed and even from a standing-start (so your seated position will be maintained whilst transitioning up the kerb).

Discreet by design

The kerb climber fits snugly behind your footrests, eliminating the problem of it dominating your foot space like traditional kerb-climbers - especially when transferring in-and-out your chair.

The power to get you there

Powered by punchy 55Ah batteries, the Q100 R/200 R loves a spin around town and longer city trips. With the stamina to go up to **31 km (19 miles)** on a single charge, you'll have plenty of time to stop-off for other adventures along the way.

YOUR TRAVELLING COMPANION

Primed for public transport, the intuitive Q100 R/200 R is so compact and manoeuvrable getting on-and-off trams, buses and trains is a breeze. Prefer to travel by car? The Q100 R/200 R can be compactly stored in the boot or used as a seat whilst travelling.

Perfect for hoisting

The Q100 R weighs a trim 95 kg (and the Q200 R weighs 98 kg), so both can be hoisted in and out of your vehicle with ease. Worried about space? With a fully fold-down back and removable legrests/armrests, it'll fit snugly in most cars or nicely store away at home.

SIT BACK AND RELAX

The O100 R/200 R seating has been designed to fit you. With plenty of settings and a 5-strap tension adjustable back to meet postural requirements, take comfort in knowing that if your needs change, so can your seat.

Seat adjustments

- Seat depth from 405-505 mm ⁽¹⁾
- Optional legrest width from 380-540mm ⁽²⁾
- Backrest angle from 0°, 4°, 8° and 12° ⁽³⁾
- Seat angle from 0°, 3° and 6° ⁽⁴⁾

- Seat width from 430-540 mm ⁽⁵⁾, reduced to 15" with opt. in-rig kit
- Side guard from 0-50 mm ⁽⁶⁾
- Optional seat height from 430-520 mm ⁽⁷⁾
- Armrest height 230-305 mm ⁽⁸⁾

DESIGNED SMART LOOKS SMART

Make a statement with the Q100 R/200 R's sophisticated matt black contoured shroud, drive and castor wheels. Its super-styled curves are just as smart as its design.

Get expressive with colour

Look smart with a choice of 4 vibrant colour decals to complement your personality.

WHICH DRIVE-BASE WILL YOU CHOOSE?

Now that you've read all about the QUICKIE Q100 R/200 R's smart indoor and outdoor features, the difficult decision is now deciding which drive base to choose.

Superior indoor manoeuvrability

Boasting the smallest footprint of 540 mm width and 1010 mm length, the Q100 R's turning circle is a tiny 1600 mm, so navigating even the tightest of spaces is a breeze. Going out? The Q100 R provides a stable ride on urban roads and paths, ideal for those day trips out. Unbelievably light at 95 kg, the Q100 R is easy to hoist in and out of your car.

12.5" Drive wheels and 8" front castors provide a shorter base length for a tighter turning circle.

Slimmest base width of 540 mm for compact manoeuvrability indoors.

Greater outdoor performance and Tilt

With a longer length of 1070 mm, 570 mm width and sporting bigger 14" drive wheels and 9" castors, the Q200 R provides greater stability and traction than its little brother. That extra-muscle will come in useful when riding over rough, uneven terrain and also allows you to climb kerbs of up to 100 mm (4"). Combined with tilt the Q200 provides one of the most compact tilt in space chairs available.

Larger 14" drive wheels and 9" front castors for better kerb-climbing and handling of outdoor terrain.

Base length of 1070 mm for greater stability on gradients and uneven surfaces.

NEXT GENERATION UNIQUE TECHNOLOGY.

To continue the drive for innovation for the Q100 and Q200 we have developed a whole host of new options and accessories. These new options attract a wider group of users to benefit from what the Q100 and Q200 have to offer.

Comfort Backrest

Use the new Sedeo Lite comfort back for greater postural support and a comfortable ride.

Tilt-in-space

The narrowest chassis available (58cm), 3" centre of gravity and 22° tilt-in-space, the Q200-R is the smallest rear wheeldrive tilt-in-space powerchair on the market at an affordable price.

17" or 19" Front Frame

Choose your seat based on your size with growth from 15" upto 21" the Q100 & Q200 offers a solution to an even wider range of clients!

Centre Mount

New smaller centre mount options reduce the turning circle by 10cm, making it even more intuitive for indoor manoeuvrability without compromising on outdoor performance.

Powered Recline Back

A powered recline back ideal for when you want to adjust your position independently to relax.

Lower Seat Height Options 42cm!

Lower 42cm seat height options makes it easier to access WAV or manoeuvre under tables.

Gyro

Keep on track with Gyro-Control. The tracking system automatically detects and corrects the smallest deviation from your direction.

10kph motors

Bigger outdoor performance features, means that the Q100R/ Q200R can go even further than before.

Lights and Indicators

New options with lights and indicators. Take advantage of our new options during the daytime and at night.

R-Net

The superior R-Net advanced joystick with a large, easy-to-read HD display and simple to control paddle switches allow for intuitive operation.

Attendant Control

The attendant control makes it easier for the attendant to control the chair with ease and confidence.

Powered or Manual Elevating Legrests

Select from a range of legrests from 70° or 80°; enjoy either manual or powered elevating legrest.

Solid Seat Pan

Select either the sling seating for comfort or the solid seat pan to stabilise your seated position.

Jay Cushions

Designed for pelvic stability, skin protection and comfort, JAY cushions and backs are low maintenance, and can be tailored to suit you.

Whitmyer Headrest

A large range of whitmyer headrests are available to order, we have a headrest to meet every user's clinical needs.
